Jorge Salgado

Wellmed, a physician-led health care company founded in 1990, broke ground Feb. 28 for the expansion of its clinic in the Lower Valley.

Located at 501 N. Yarbrough, the new construction will increase the size of an existing building, making it possible to provide medical services to more people eligible for Medicare. WellMed partners with Medicare Advantage health plans in Texas and Florida. For more information, visit wellmedhealthcare.com.
