

WellMed teams up with Landmark for Houston in-home medical care

WellMed has teamed up with Landmark, a mobile medical provider in our Houston community, to deliver house calls at no cost to you.* You now can have in-home medical care—in addition to your current doctors and specialists.

Landmark updates your primary care doctor after each in-home visit, and services are voluntary.

Landmark provides in-home medical care and help by phone.

- Doctors and other clinicians visit you at home at times that work for you.
- Urgent in-home visits include wound care, IV antibiotics, catheter support and more.
- In-home visits after a hospital stay are available to help explain discharge instructions and new medicine.
- 24/7 phone support is available, including weekends and holidays.
- Landmark offers help with mental health, as well as dietary and social concerns.
