

## **WELLMED AND OPTUM HOST 2023 FLORIDA ONETEAM EXCELLENCE SUMMIT**

WellMed and Optum hosted the 2023 Florida summit, OneTeam Excellence, in Orlando in February. The summit was a gathering of those who support contracted providers. The group consisted of medical directors and representatives from the market operations, DataRAP, quality, care management, and business development and growth teams.

The time was focused on teammate engagement and networking. The agenda also included updating support teams on new initiatives, reinforcing our value proposition and outlining business objectives for the next several years. As part of the summit, the teams participated in a team-building activity for Kids Against Hunger. The goal for the team building was to battle food insecurities within the local Orlando community.

In partnership with Kids Against Hunger, employees worked together to build more than 19,000 meal kits, exceeding the goal of 17,600. The kits went to the Second Harvest Food Bank and their network of partners that will distribute the meals throughout the Orlando region. Individuals worked as one team to build relationships, create connections and make an impact on countless children, older adults and families.
